

Recommendations

- Training focal points in health sector
- Extend weather information to other sector rather than Agriculture
- Mobile application in all languages is necessary for easy dissemination of weather information

- Develop malaria monitoring system
- Develop early warning system
- Researches are needed to improve Meteo_Rwanda Services
- Use representable station to make a forecast for a specific area
- Provide detailed information, reduce technical terms used while packaging the information

- Integrate all data sources together such as RADAR data, Station data and Satellite data to increase accuracy
- Down scale forecast to the sector level
- Increase awareness in all sectors
- National risk atlas updates to be updated
- To work with districts in order to harmonize the criteria of high risk zones with those risk atlas

VIEWS FROM PARTICIPANTS

- Participants were happy to know that weather information is available for public health.
- Increase EWS dissemination channels
- To conduct simulation to different hazards
- MIDIMAR/Go'vt RWANDA to provide subsidies access to lightning arresters
